Course Description:

The objective of this course is to try and stitch together various strands of information collected over the years through interesting facts from books, movies, news clippings and often history classes themselves, to understand humanity, and to give meaning to globalization in its true sense.

In this course, students will focus on creating the bigger picture by connecting narrower strands of information. The course will include a look back in time, connecting it to contemporary social, political and economic scenarios with changes in humanity, and the evolution in forms of expression.
